Invitation

It is my distinct honour and privilege to extend to you an invitation, on behalf of the Scientific Board, to attend the "International Symposium - Pelvic Floor Disorders: Focus on," organized by the Italian Unitary Society for Coloproctology (SIUCP) in collaboration with the Nigerian Society for Colorectal Disorders (NSCRD), the Romanian Society of Coloproctology (RSCP) and the contribute of SMIP (Society for Interdisciplinary Monitoring in Pelviperineology)

This symposium is scheduled to take place in Reggio Emilia, Italy, from March 21st to 23rd, 2024, and promises to be a significant event in the field of colorectal disorders.

The "International Symposium - Pelvic Floor Disorders: Focus on" is a congress of profound international importance, bringing together leading experts, clinicians, and researchers from across the globe to share their insights, research findings, and innovations in the field of colorectal and pelvic floor disorders. This symposium serves as a platform for cross-border collaboration, promoting international partnerships and the exchange of invaluable knowledge.

One distinctive feature of this symposium is the active involvement of the Nigerian Society for Colorectal Disorders (NSCRD) and Romanian Society of Coloproctology (RSCP) as a co-organizing scientific societies. Their participation significantly enhances the scientific and organizational aspects of this event and, with their support, the symposium is poised to offer a unique opportunity for attendees to engage with experts from different parts of the world and gain a comprehensive understanding of the latest developments in colorectal and pelvic floor disorders.

Many clinicians aspire to a multidisciplinary approach to the management of colorectal and pelvic problems, and the first step in widening the horizons of each of us is to communicate with our peers and colleagues from other specialties.

We hope for a strong and productive discussion among all the involved professional roles, working together to ensure better solutions for patients with colorectal and pelvic floor disorders with the contribute of SMIP (Society for Interdisciplinary Monitoring in Pelviperineology) especially in the management and treatment of multiorgan prolapse. That is the aim of this conference.

More than 300 participants will attend the meeting and pre-meeting courses based on new technology, such as HRA-anoscopy and anal precancerosis, Masterclass in Pelvic Floor Surgery, Pelvic Floor Rehabilitation, Sacral Neuromodulation, and Diagnostic Course in Pelvic Floor Disorders.

I hope you enjoy the various activities and meetings in Reggio Emilia, as well as the social events that make up the official program listed below.

I look forward to meeting you.
